About Me

I'm a Full-Stack Developer at UST Global in Trivandrum, India, where I work as part of the Gen AI team. I specialize in building intelligent applications that integrate Python-based AI pipelines, including agentic systems, RAG (Retrieval-Augmented Generation), web scraping, and context-aware LLM chatbots. With a strong foundation in React and Angular, I'm passionate about combining cutting-edge AI with intuitive front-end experiences to solve real-world problems.

Skills

- **Languages & Frameworks:** Python, Java, Spring Boot, Angular, React
- **AI/ML:** RAG, Agentic AI, Prompt Engineering, Contextual Chatbots, LLMs, Web Scraping
- **Development:** Microservices, Full-Stack Apps, SQL, REST APIs
- **Soft Skills:** Problem-solving, teamwork, leadership

Experience

Full-Stack Developer, UST Global, Trivandrum, India — Oct 2024 - Present

As part of the Gen AI UK Team, I develop full-stack applications using Python, React, and Angular. My work involves building context-aware chatbots using LLMs, implementing RAG pipelines, prompt engineering for better model alignment, and integrating agentic AI systems to automate data workflows. I also contribute to clean, responsive front-ends and collaborate across teams to deliver practical, AI-powered solutions.

Branding Lead, IEDC MITS Kochi — Aug 2022 - June 2023

Led marketing efforts to enhance brand visibility, coordinating campaigns and collaborating with teams to promote innovation and entrepreneurship.

Education

B.Tech, Computer Engineering, APJ Abdul Kalam Technological University — 2020 - 2024
- Grade: 75.55%

Higher Secondary, Computer Science, Mar Coorilose HSS, Pattimatom, Kerala, India — 2018 - 2020
- Grade: 94.55%

SSLC, Mar Athanasius Memorial HSS, Puthencruz, Kerala, India — 2017 - 2018
- Grade: 100%

Projects

Context-Aware Chatbot with LLMs
Designed and deployed multiple intelligent chatbots that maintain contextual awareness and dynamically respond using LLMs, combined with RAG and prompt tuning.

Attendance System with FaceNet
Developed a real-time face detection system achieving 98% accuracy, reducing timekeeping errors by 30% using Python and AI technologies.

AI Career Recommendation
Created an AI-driven hiring tool integrated with a web interface for HR systems, enhancing recruitment efficiency.

Library Management System
Designed a user-friendly system to streamline library operations, leveraging full-stack development skills.

Certifications

- **Business English Certificate** – Cambridge English, June 2021
- **MERN Full Stack** – ZeroPixels, Jan 2024
- **Django and Python** – ZeroPixels, June 2023
